

7 STRIP REQUESTS, 1001-1999

These cards are required only in STRIP-type problems. One or more cards are entered, each card containing one variable request. Card numbers need not be consecutive. Variables are ordered on the STRIPF file in the order of increasing card numbers. If an incorrect variable request code is entered, the value will be 0.0. It is not flagged as an input error, since at some later time in the transient, a renodalization may result in the variable request code becoming correct.

7.1 CARDS 1000, X-VALUE DATA FOR PLOTTING

W1(R) Minimum X-Value for Window X-Y Plot

W2(R) Maximum X-Value for Window X-Y Plot

7.2 CARDS 1001 THROUGH 1999, STRIP REQUEST DATA

These cards are required only in STRIP-type problems. One or more cards are entered, each card containing one variable request. Card numbers need not be consecutive. Variables are ordered on the STRIPF file in the order of increasing card numbers. If an incorrect variable request code is entered, the value will be 0.0. It is not flagged as an input error, since at some later time in the transient, a renodalization may result in the variable request code becoming correct.

W1(A) Alphanumeric part of the variable request code.

W2(I) Integer part of the variable request code.

W3(R) Minimum Y-Value for Window X-Y Plot

W4(R) Maximum Y-Value for Window X-Y Plot
